DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 4-6, filed 5/7/2009, with respect to claims 1-8 have been fully considered and are persuasive. The 35 USC § 102(a) rejection of claims has been withdrawn.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are not tied to a particular machine or apparatus see ***Re Bilksi***. The Examiner recommends the claim recite "transmission device" forming each of the steps, e.g. "transmission device forming collective Internet Protocol data packet..."

Allowable Subject Matter

Claims 5-9 are allowed.

The Applicant's arguments regarding Low reference that the packets are encrypted many times, i.e. for each packet, as opposed to once for the collective packet as claimed is persuasive.
